Apple Footer • This site contains user submitted content, comments and opinions and is for informational purposes only.. You can 'zoom' the entire screen using a key combination Some applications (such as Safari) allow you to zoom in on the display using a two-finger trackpad gesture.. In that case please open System Preferences > Accessibility Review the options available to you under Vision.. Font sizes themselves are changed in text editing applications (such as Pages) using a menu selection, but there is no equivalent way of doing that in the Finder (for example) or other apps that are not intended to manipulate text.. But let's say you're a professional writer, and your editor is a stickler for old-school standards. 773a7aa168 [Debian Installation Failed Select And Install Software](#)
